ABOUT ME

Senior Software Engineer (AVP) with 8.5+ years of experience bridging the gap between robust Enterprise Engineering and cutting-edge Generative AI. Expertise in building scalable full-stack systems using .NET, Python (FastAPI), and Modern JS, with a current focus on Agentic AI workflows and autonomous process automation. Proven track record in cloud-native migrations (PCF to OpenShift), CI/CD orchestration, and driving automation excellence through AI-driven testing (Playwright/MCP). Passionate about architecting intelligent systems that enhance developer productivity and system performance.

EXPERIENCE

Senior Software Engineer - Wells Fargo India (Nov 2021 - Present)

- Deployed on STARS project using .NET, C# & Angular-17, with cross functional contributor to CRIS & 1DLT team.
- Developed and deployed Generative AI solutions utilizing Python and FastAPI for the **STARS - LP assessment module**, integrating Agentic workflows and RAG pipelines to automate complex enterprise banking processes.
- Engineered an AI-driven Engineering Ecosystem by integrating JIRA-MCP and Confluence agents, enabling autonomous task tracking and automated technical documentation to reduce manual overhead.
- Accelerated developer onboarding and environment consistency by implementing DEVInit, standardizing workspace configurations and streamlining the setup for complex micro-services.
- Modernized the testing infrastructure by integrating HEX (HyperExecute) and Playwright AI agents, cutting CI test execution time by 50% and reducing regression cycles by 40%.
- Orchestrated a large-scale cloud migration from PCF to OpenShift, leveraging AI-assisted engineering to reduce infrastructure-related incidents by 30% and improve deployment reliability.
- Served as a Technical SME, mentoring 3+ cross-functional teams on modern design patterns, Clean Engineering, and the strategic integration of AI agents into CI/CD pipelines.
- Reduced MTTR (Mean Time to Resolution) by 35% through proactive incident triage and the implementation of Circuit Breaker patterns and system monitoring.
- Enforced rigorous engineering standards through code reviews and pair programming, resulting in a 25% reduction in production defects and improved system maintainability.
- Maintained CI/CD pipelines using Jenkins, Azure DevOps, and GitHub Actions, enabling faster, safer releases and consistent feature delivery within Agile/Scrum timelines.

Consultant Allstate India (Mar 2020 – Sep 2021)

- Developed and enhanced Agent Central and Dealer Services - vehicle insurance web applications using ASP.NET, C#, Angular, and SQL Server, serving large-scale business operations.
- Designed and developed a Floor Management application using React, Python (FastAPI), and MySQL for the Allstate Facility Team during COVID, enabling safe, rotational seat allocation for returning employees.
- Worked closely with product owners and business stakeholders to translate requirements into scalable technical solutions.
- Delivered features and fixes with high quality in Agile sprint cycles, ensuring on-time releases.

Software Developer Coding Brains Solutions Pvt Ltd (Sep 2018 – Mar 2020)

- Delivered end-to-end full-stack solutions using .NET, JavaScript, and SQL Server across multiple client-facing projects.
- Developed and maintained applications such as PaceAirFreight, CatScale, and AirlineApps, handling both frontend and backend components.
- Reduced post-release defects through structured testing and early bug identification.

Software Developer SISL INFOTECH Pvt Ltd (Apr 2018 – Jul 2018)

- Contributed to state government web applications (UPSSC) using ASP.NET and SQL Server.
- Implemented secure and compliant modules aligned with government standards and deadlines.

Software Developer/ Trainee ACME Digitek Solutions Pvt LTD (Dec 2014 – May 2015 | Jun 2017 – Mar 2018)

- Worked on government portals including UP RERA and GDA, contributing to backend services and frontend modules.
- Gained hands-on experience in enterprise .NET application development and production deployments.

CORE SKILLS

- **AI & Agentic Engineering:** Generative AI, Agentic Workflows, LLM Orchestration, RAG Pipelines, Model Context Protocol (MCP), Prompt Engineering, JIRA-MCP, Sonar-MCP.
- **Languages:** C#, Python, JavaScript (ES6+), TypeScript, Java, PL/SQL.
- **Frameworks & Libraries:** FastAPI, .NET / ASP.NET Core, Angular 16+, React.js, Node.js.
- **Testing & Automation:** Playwright(TS/AI agent/MCP), Selenium (C#/Java), HEX (HyperExecute), xUnit, Jest.
- **Cloud & DevOps:** OpenShift (OCF), Azure, PCF, Docker, Podman, CI/CD (Jenkins, GitHub Actions, Harness, DEVInit).
- **Databases & Messaging:** SQL Server, Oracle DB, MongoDB, Vector Databases, Kafka, RabbitMQ, Solace MQ.
- **IDEs & Tools:** Visual Studio, VS Code, Rider, SSMS, Git, Confluence.

EDUCATION

- Completed MCA from Amity University, 2015 with CGPA - 6.27
- Completed Bachelor in Science from Lucknow University, 2012 with 54.5%

ACHIEVEMENTS | Trainings

- Completed AZ-900 Cloud certification[Microsoft Certified: Azure Fundamentals - Credly].
- Completed Full stack generative and agentic AI with python And Hugging face Agentic AI fundamentals
- Completed Angular & .NET core training with Neil Cummings as an Instructor.
- Completed NodeJS, Express & MongoDB training with Jonas Schmedtmann as an Instructor.
- Completed React & .NET core training with Neil Cummings as an Instructor.
- Completed Docker & Kubernetes: The Practical Guide [2025 edition]
- Completed week long Military training in AMITY UNIVERSITY Manesar, Gurgaon.
